

Leveling agent **Tech-210A**

Descriptions

Tech-210A is the solution of polyester modified polysiloxane, it has excellent compatibility with most paint resins and has no reverse influence on recoatability. It provide mar resistance for coating film and improve the gloss of the paint film. Because of its polyester section, it could be used in baking systems.

Physics and Chemical properties

Ingredient : Polyester modified polysiloxane

Appearance: colorless transparent liquid

Content : 25%

Solvent: solvent naphtha

Specialty

1. Tech-210A provides slip, gloss enhancement and excellent anti-crater performance.
2. Tech-210A provides mar resistance for coatings applications and could be used in baking systems.
3. Tech-210A compatible with acrylic, alkyd, amide, epoxy, nitrocellulose, phenolic, polyester, polyurethane and vinyl systems

Application System and Dosage

Tech-210A is recommended to use in the solvent coating systems.

Usually, it could be charged at random stage during the produce with **0.1%** to **1%** dosage to gross.

Package

25kg metal pail.
