

Non-silicon leveling agent Tech-1355

Descriptions

Tech-1355 is an acrylate copolymer, suitable for a variety of solution types and water-based systems, with good compatibility, which can increase the surface tension of the final paint film and improve the wetting effect after recoating while improving the leveling effect

Physics and Chemical properties

Ingredient: Acrylate copolymers

Appearance: Light yellow viscous transparent liquid

Content: 50%

Solvent: Dipropylene glycol monomethyl ether

Specialty

1. Tech-1355 has good compatibility and leveling in solvent-based systems
2. Tech-1355 can improve the surface tension of the final paint film

Application System

It is used in a variety of solvent-based and water-based coating systems

Dosage

Generally, it is 0.1-1% of the total amount, which can be added at any stage of the production.

Package

25kg iron drum

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability in advance.
