

Silicone defoamer Tech-353

Description

Tech-353 is fluorine modified organic silicon antifoaming agent has good antifoam ability. It also has good compatibility and could be used in all solvent based systems.

Physics and Chemical properties

Ingredient: Modified polysiloxane

Appearance: : Colorless to light yellow transparent liquid

Content: 1%

Solvent: mixed ester

Specialty

1. Tech-353 is suitable for the solvent coating system has excellent abilities to restrain and break the foam.
2. Tech-353 has very good compatibility. It has no any influence on the transparency of paint film in various application systems.
3. Tech-353 has comprehensive applications which can be used in various common coating systems.

Application System and Dosage

Tech-353 is suitable for all of the solvent system.

Usually, it could be charged at random stage during the produce with **0.1%** to **1%** dosage to gross.

Package

25kg pail or 190kg drum

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability in advance.
