

Silicone defoamer Tech-341

Description

Tech-341 is an organic silicon antifoaming agent for the solvent system. It has the great ability to break the bubble quickly during the coating manufacture. Meanwhile, Tech-341 has excellent compatibility and high use security.

Physics and Chemical properties

Ingredient: Modified silicone

Appearance: Colorless to light yellow transparent liquid

Content: 3%

Solvent: Solvent naphtha

Specialty

1. Tech-341 is proper for the solvent coating system has good antifoaming ability.
2. Tech-341 has very good compatibility and has no reverse influence on the gloss.
3. Tech-341 can be helpful for eliminating fish eyes, pinholes, crater and hidden foam and such faults on the film.

Application System and Dosage

Tech-341 is suitable for all of the solvent system.

Usually, it could be charged at random stage during the produce with **0.1%** to **1%** dosage to gross.

Package

25kg pail or 180kg drum

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability in advance.
