

Substrate wetting agent Tech-2461

Describe

Tech-2461 is an anionic fluorocarbon modified surfactant, which can greatly reduce the surface tension of the system and improve the wettability of the substrate.

Physical and chemical parameters

Component: modified organic fluorine surfactant.

Appearance: Light yellow transparent solution

Content: 15%

Solvent: water

Application system and dosage

Suitable for water-based systems

The addition amount varies according to different use systems, generally 0.1-1% of the total amount, and can be added at any stage of production.

Packaging

25kg plastic pail

TECH Polymer

A company focus on additives since its birth
