

Substrate wetting agent Tech-2431

Description

Tech-2431 is polyether modified fluoro compound. It can decrease the system surface tension and provide excellent substrate wetting.

Physics and Chemical properties

Ingredient : Fluoro-surfactant

Appearance: Light yellow liquid (It will freeze at low temperature)

Content : 100%

Specialty

Leveling	Wetting	Recoat Ability	Compatibility	Sliding	Low Foaming Stability	Anti-crater	Anti-adhesive
★★★★★	★★★★★	★★★★★	★★★★★	★	★★★★★	★★★★★	★

Application System and Dosage

The dosage is around 0.1-1%

Package

25kg plastic pail.
