

Adhesion promoter Tech-7200

Description

Tech-7200 is a branched polyester with active hydrogen atoms adhesion promoter. It is suitable for melamine baking system which can enhance the adhesion between the paint film and the metal substrate. Tech-7200 has good compatibility with melamine resin systems.

Physics and Chemical properties

Ingredient: Special polyester

Appearance: Colorless to light yellow transparent liquid

Content: 75%

Solvent: Iso-propanol

Specialty

1. Tech-7200 adhesion promoter is suitable solvent melamine baking system to metal substrate.
2. Tech-7200 is a branched polyester with active hydrogen atom that could accelerate the adhesion rapidly to substrate.
3. Tech-7200 has good compatibility to melamine resins.

Application System and Dosage

TECH-7200 is recommended to use in the *melamine baking* oil or waterborne coating systems.

Usually, it could be charged at random stage during the produce with **0.1%** to **5%** dosage to gross.

Package

25kg pail or 200kg drum

TECH Polymer

A company focus on additives since its birth
