

Acid catalyst Tech-8296-1

Describe

Tech-8296-1 is a phosphate acid catalyst with high catalytic efficiency and good compatibility with paint film, which is helpful to improve the flexibility, water resistance and salt spray resistance of cured paint film.

Physical and chemical parameters

Component: organic phosphate compound

Appearance: pale yellow transparent solution

Active ingredient: 100%

Specificity

- ◆ Tech-8296-1 is suitable for solvent-based baking paint system, and it will not have adverse effects on paint film within the recommended dosage range.
- ◆ Tech-8296-1 can improve crosslinking density, hardness of paint film, and improve corrosion resistance, hydrolysis resistance, solvent resistance and mechanical properties of paint film.

Application system and dosage

Can be suitable for high-temperature acrylic amino baking paint.

The addition amount varies according to different use systems, generally 0.5%-3% of the total amount, which can be added at any stage of production.

Packaging

25kg plastic pail

TECH Polymer
