

Acid catalyst Tech-8149

Description

Tech-8149 is a acid catalyst based on Dinonylnaphthalene sulfonic acid. It can reduce the cross-linking reaction temperature in baking system.

Physics and Chemical properties

Ingredient: blocked Dinonylnaphthalene sulfonic acid

Appearance: Yellow transparent liquid

Content: 30%

Solvent: mixed alcohol

Specialty

1. Tech-8149 is proper for the solvent baking varnish system. It can decrease the cross-linking reaction temperature of baking varnish. It shall has no disadvantageous influence on the painting film if the usage amount was within the recommended amount.
2. Tech-8149 has the abilities to decrease the cost and boost the coating efficiency.

Application System and Dosage

Tech-8149 is applied in high temperature acrylic acid amino baking varnish, vehicle repair painting, ordinary industrial baking varnish, coiled material and metal decorating coating and so on.

The amount is in terms of the different application system, around 1-5% of total in common. Tech-8149 can be put in during any step of manufacture.

Package

25kg plastic pail.

TECH Polymer

A company focus on additives since its birth
