

Rheology modifier Tech-9020

Description

Tech-9020 is a dispersion of polyamide wax rheology modifier with small size. It has strong rheology and easy to introduce, suitable for all kinds of solvent-based systems to be used as anti-sagging and anti-setting agent.

Physics and Chemical properties

Ingredient: Dispersion of polyamide wax

Appearance: Light yellow to white serum

Content: 20%

Solvent: Aromatic solvent/alcohol

Specialty

1. Tech-9020 is proper for the solvent varnish system. It can rapid increase the viscosity and make the coating great in ability of anti-setting and anti-sagging.
2. Tech-9020 can used in wood varnish for anti-setting.

Application System and Dosage

Tech-9020 is applied in all solvent base industry coating systems.

The amount is in terms of the different application system, around 0.5-2.0% of total in common when used as anti-setting agent and 2.0-5.0% as anti-sagging agent. Tech-9020 should be put in last step of manufacture.

Package

16kg metal pail.
