

Rheology Modifier Tech-9421

Description

Tech-9421 is a modified EVA wax emulsion, which provides certain thixotropy and can effectively improve the orientation of metal pigments in water-based systems

physicochemical parameters

Ingredients: modified EVA wax emulsion

Appearance: white emulsion

Active ingredient: 20%

Solvent: water

Application system and dosage

Suitable for all types of water coating systems.

The dosage is 5-10%. It is recommended to add it under low shear conditions. It is recommended to adjust the initial PH value of the system to about 9

Packaging

25kg plastic pail

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability in advance.
