

Substrate wetting agent Tech-242

Description

Tech-242 is a special designed Gemini surfactant. It is suitable for water borne systems to supply substrate wetting and defoaming. It could decrease both dynamic and static surface tension.

Physics and Chemical properties

Ingredient : special Gemini surfactant

Appearance: Light yellow transparent liquid

Content : 100%

Specialty

1. Tech-242 consists of modified Gemini surfactant.
2. Tech-242 could decrease both dynamic and static surface tension.

Application System and Dosage

TECH-242 is recommended to use in the *water borne* systems.

Usually, it could be charged at random stage during the produce with **0.1%** to **1%** dosage to gross.

Package

25kg metal pail.
