

Dispersant Tech-513

Description

Tech-513 is a copolymeric dispersant designed suitable for organic pigment especially dispersion in solvent borne coating systems. It has good compatibility with many kinds of resin, suitable for all kinds of pigment and filler, and with strong dispersing power and excellent store stability.

Physics and Chemical properties

Ingredient : Copolymer with pigment affinity group

Appearance: Yellow transparent liquid

Content : 50%

Solvent: solvent naphtha

Specialty

1. Tech-513 dispersant suitable for all kinds of pigment dispersion in solvent borne coating systems, especially for leather color paste and with good compatibility.
2. Tech-513 is a copolymeric dispersant with strong dispersing power and excellent store stability.

Application System and Dosage

Tech-513 is recommended to use in solvent borne *leather and synthetic leather* coating systems.

Usually, it should be charged before the grind stage during the produce, with **5%** to **10%** to inorganic pigment, **10%** to **30%** dosage to organic pigment, **20%** to **50%** dosage to carbon black.

Package

25kg metal pail.
