

## Adhesion promoter Tech-7020

### Description

Tech-7020 is an organic silicon compound with amine group. It's one kind of excellent adhesion promoter which has special designed for the silicate, metal, ceramic and filler system to improve the product's feature and enhance the adhesion between surfaces.

### Physics and Chemical properties

**Ingredient:** Silicone compound with amine group

**Appearance:** light yellow Transparent Liquid

**Content:** 100%

### Specialty

1. Tech-7020 could be used as surface treatment agent for inorganic substance. Tech-7120 can activate the glass wool, silica hydrated, french chalk, mica.
2. Tech-7020 can increase the adhesion between paint film and glass substrate very well.
3. Tech-7020 can participate the cross linking with paint film so as to reinforce the mechanical property of the paint film.

### Application System and Dosage

Tech-7020 could be used in systems such as polyurethane, epoxy, alcohol acid. The product will become a slight yellow color after stay for a long time since it includes the amino, but which has no any influence on the usability. It is necessary that clear up the oil and liquid on the substrate before coating, so as to prevent from any influence on the stability.

Usually, it could be charged at random stage during the produce with **0.1%** to **1%** dosage to gross.

### Package

**25kg** metal pail.
