

Adhesion promoter Tech-7720

Description

Tech-7720 is a polymeric silane with epoxy group. It is suitable for solvent-base and water-base systems. It can improve the adhesion and water-resistant of the coating film.

Physics and Chemical properties

Ingredient : Silicone compound with epoxy group

Appearance: Colorless viscous transparent liquid

Content : 100%

Specialty

1. Tech-7720 is used with glass paint. Then it can increase the adhesion between paint film and glass substrate very well.
2. Tech-7720 can participate the cross linking with paint film so as to reinforce the mechanical property of the paint film.

Application System and Dosage

Tech-7720 could be used in systems such as polyurethane, epoxy, alkyd and etc. It is necessary that clear up the oil and liquid on the substrate before coating, so as to prevent from any influence on the stability.

Usually, it could be charged at random stage during the produce with **0.1%** to **5%** dosage to gross.

Package

25kg plastic pail.
