

## Rheology modifier Tech-9030

### Description

Tech-9030 is a dispersion of polyamide wax rheology modifier with small sized and easy to disperse, great in anti-setting and anti-sagging ability. It has strong rheology and easy to introduce, suitable for all kinds of solvent-based systems to be used as anti-sagging and anti-setting agent.

### Physics and Chemical properties

**Ingredient** : Dispersion of polyamide wax

**Appearance**: white powder

### Specialty

1. Tech-9030 is proper for the solvent varnish system. It can rapid increase the viscosity and make the coating great in ability of anti-setting and anti-sagging.
2. Tech-9030 can used in wood varnish for anti-setting.

### Application System and Dosage

Tech-9030 is applied in all solvent base industry coating systems.

The amount is in terms of the different application system, around 0.5-2.0% of total in common when used as anti-setting agent and 2.0-5.0% as anti-sagging agent. Tech-9030 should be put in last step of manufacture.

### Package

**25kg** metal pail.
