

Non-silicon leveling agent Tech-117

Description

Tech-117 is a high boiling solvent blend that contains no aromatic hydrocarbons and meets environmental standards. It is widely used in various solvent-based coating systems, which can improve the wetting ability of the coating to the substrate, extend the opening time of the coating system, promote leveling, and obtain a high flatness paint film.

Physics and Chemical properties

Ingredient: high boiling point solvent mixture

Appearance: colorless transparent liquid

Content: 100%

Specialty

1. It has excellent compatibility and leveling properties in solvent-based systems, which can prevent the formation of craters and fisheyes.
2. It has a good ability to wet the substrate.
3. It has an excellent final leveling effect and can obtain a highly flattened paint film.

Application System

It is used in solvent-based systems such as alkyd, acrylic, amino baking paint, polyurethane, etc.

Dosage

Generally, it is 0.1-1% of the total amount, which can be added at any stage of the production process.

Package

25kg iron drum

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability in advance.
