

Non-silicon defoamer Tech-411W

Describe

Tech-411W is a non-silicon defoamer, specially designed for water-based coating systems, which has strong defoaming and defoaming ability, does not affect the recoating property, and does not have adverse interaction with the system. At the same time, Tech-411 is also suitable for solvent-based systems.

Physical parameters

Component: non-silicon polymer solution

Appearance: pale yellow turbid liquid.

Active part: 30%

Solvent: Paraffin/Isooctanol =20:1

Characteristic

1. Tech-411W has excellent defoaming ability in water-based coating system, and will not affect the gloss.
2. Tech-411W has excellent recoating property and extremely low shrinkage tendency.

applied range

Used in water-based system, solvent-based system, etc.

Suggested dosage

For 0.3~1.0% of the total amount, please test the best dosage; After addition, it should be mixed under high enough shear force. It is recommended to add it before grinding.

The addition amount is different according to different use systems, and can be added at any stage of production.

Pack

25kg plastic bucket

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability in advance.
