

Dispersant Tech-570

Description

Tech-570 is macromolecule dispersant. It is suitable for organic and inorganic pigments and it can decrease the viscosity and improve the anti-floating and anti-flooding.

Physics and Chemical properties

Ingredient: copolymer of macromolecular with pigment affinity group

Appearance: Brown transparent liquid

Content: 40%

Solvent: solvent naphtha

Specialty

1. Tech-570 is suitable for the medium polarity system
2. Tech-570 can improve the wetting dispersing ability for the pigments and fillers.
3. Tech-570 is very suitable for coil coating.

Application System and Dosage

Tech-570 is suitable for all solvent-based systems.

The dosage is **5%** to **10%** to inorganic pigment, **30%** to **50%** to organic pigment, **40%** to **80%** to carbon black.

Package

25kg metal pail.

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability in advance.
