

Rheology modifier Tech-9607

Description

Tech-9607 is a special polymeric rheology modifier with great anti-setting and anti-sagging ability. It is suitable for vinyl ester, epoxy resin, unsaturated polyester, radiation curing systems. It could reinforce the rheological effectiveness of pyrogenic silica.

Physics and Chemical properties

Ingredient: Modified polyamide solution

Appearance: Yellow viscous solution

Content: 65%

Solvent: benzyl alcohol

Specialty

1. Tech-9607 is suitable for vinyl ester, epoxy resin and unsaturated polyester systems
2. Tech-9607 could reinforce the rheological effectiveness of pyrogenic silica.

Application System and Dosage

The dosage is about 5-30% according to silica

Package

25kg metal pail.

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability in advance.
