

Leveling agent Tech-2041

Descriptions

Tech-2041 is polyether modified polysiloxane, it has excellent anti-crater ability, greatly decrease the surface tension and helpful for the orientation of matting agent. It could provide excellent leveling and low foam stability in solvent-born systems and in water-born systems.

Physics and Chemical properties

Ingredient : Polyether modified polysiloxane

Appearance: Light yellow viscous transparent liquid

Content : 100%

Specialty

Leveling	Wetting	Recoat Ability	Compatibility	Sliding	Low Foaming Stability	Anti-crater	Anti-adhesive

Application System and Dosage

Tech-2041 could be used in solvent-based, water borne and UV coatings.

Usually, it could be charged at random stage during the produce with **0.1%** to **1%** dosage to gross.

Package

25kg metal pail.
