

Polymeric defoamer Tech-431

Description

Tech-431 is a universal acrylic defoamer with high defoaming ability. It is special designed for high viscosity systems and it is suitable for the primer with high zinc stearates, and also suitable for almost all solvent-based systems.

Physics and Chemical properties

Ingredient : Acrylic polymer

Appearance: Light yellow transparent liquid

Content : 100%

Specialty

1. Tech-431 is special modified acrylate compound. It has the most high antifoam ability.
2. Tech-431 can solve the difficult antifoaming problem in high viscosity system

Application System and Dosage

Tech-431 could be used in 2K PU, amino baking varnish, nitro dip-coating, acid cure amino, epoxy solvent and solvent-free systems.

The amount is around 0.1%-1.0% of total

Package

25kg metal pail.
