

Polymeric defoamer Tech-4857

Description

Tech-4857 is polymeric antifoaming agent with excellent compatibility. It special designed for the epoxy system, unsaturation polyester system.

Physics and Chemical properties

Ingredient : vinyl copolymer

Appearance: Light yellow transparent liquid

Content : 40%

Solvent : paraffin

Specialty

Tech-4857 is special suitable for unsaturated polyester system and epoxy pouring sealant system.

Application System and Dosage

The optimized amount is between 0.1 ~ 1.0% of total

Package

25kg metal pail.
