

Anti-graffiti additive Tech-2072N

Descriptions

Tech-2072N is a modified silicone compound with hydroxyl functional groups, which is disperseable in water and is suitable for use in water-based two-component polyurethane systems or water-based baking paints, which can provide excellent surface stain resistance, anti-graffiti effect, and at the same time, can improve the surface effect of the paint film

Physics and Chemical properties

Ingredient: Polyhydroxy-modified polysiloxane compounds
Appearance: Light yellow transparent solution
Content: 25%
Solvent: mixed alcohol ether

Application System and Dosage

It is widely used in all kinds of water-based two-component systems.

The dosage can be 1-6% of the total amount according to the requirements.

Package

25kg iron drum

TECH Polymer

A company focus on additives since its birth
