

Reactive silicone Tech-2176

Description

Tech-2176 is organic silicon with double -OH group. It could be used in the modification of PU resin or polyester resin and some radiation curing resins.

Physics and Chemical properties

Ingredient: double OH group terminated polysiloxane

Molecular weight: 4500

Appearance: Light yellow viscous liquid

Content: 100%

Application System and Dosage

The dosage could be 1%-30% according to the application.

Package

25kg metal pail.

TECH Polymer

A company focus on additives since its birth
