

Reactive silicone Tech-22101

Description

Tech-22101 is organic silicon compound modified by terminal acrylic acid group. In the radiation-curing system, Tech-22101 can react with the system that introduce the properties of the silicone into the materials.

Physics and Chemical properties

Ingredient: Acrylate-terminated polysiloxane (Mn≈1000-1200)
Appearance: yellow transparent liquid
Content: 100%

Application System and Dosage

Tech-22101 could be used in any cross-linking system that is reacted via acrylic group such as UPE, radiation-curing systems.

The amount is 0.2-1% for persistent slip, 2-6% for anti-dirt. Tech-22101 can be introduced in any step during manufacture.

Package

25kg metal pail.

A company focus on additives since its birth
