

## Hammer agent Tech-2711

### Descriptions

Tech-2711 is an organic modified polysiloxane solution used as a hammer pattern additive in water-based coating systems, providing excellent hammer pattern effects. A fine hammer pattern effect can be produced at a very low dosage, usually with thicker patterns at low dosage and finer patterns at high dosage.

### Physics and Chemical properties

**Ingredient:** Organic modified polysiloxane

**Appearance:** Colorless transparent liquid

**Content:** 25%

**Solvent:** dipropylene glycol monomethyl ether

### Application System and Dosage

Suitable for water-based coating systems

The addition amount varies depending on the different usage systems, generally ranging from 0.1% to 3% of the total amount, and can be added at any stage of production.

### Package

25kg metal pail.
