

Silicone defoamer Tech-367-4

Description

Tech-367-4 is a modified silicone defoamer. It has extremely strong foam suppression and foam breaking capabilities. Whether in the production or construction process of coatings, it will greatly reduce the amount of bubbles generated. At the same time, it has excellent compatibility.

Physics and Chemical properties

Ingredient: Modified polysiloxane solution

Appearance: Colorless transparent solution

Content: 1%

Solvent: Mixed esters

Specialty

1. Tech-367-4 is applicable to solvent-based coating systems and has extremely strong foam suppression and defoaming capabilities.
2. Tech-367-4 has good compatibility. In various application systems, it does not affect the transparency of the paint film.
3. Tech-367-4 has wide versatility and can be applied in various common coating systems.

Application System and Dosage

Tech-367-4 is applicable to various solvent-based coating systems and UV curing systems. The addition amount varies depending on different application systems. Generally, it is 0.1% to 1% of the total amount and can be added at any stage of production.

Package

25kg plastic pail.

TECH Polymer

A company focus on additives since its birth
