

Silicone defoamer Tech-3722

Descriptions

Tech-3722 is a modified silicone defoamer suitable for solvent-based systems, with excellent compatibility, strong defoaming ability, excellent foam breaking and foam inhibition ability, suitable for all stages of coating production and various construction methods, such as spraying, roller coating, brushing, etc

Physics and Chemical properties

Ingredient: Mixtures of modified polysiloxanes and non-silicone polymers

Appearance: Light yellow transparent solution

Content: 70%

Solvent: Aliphatic hydrocarbon

Specialty

- ◆ Tech-3722 is suitable for solvent-based coating systems and has excellent foam breaking and foam inhibition capabilities.
- ◆ Tech-3722 is applicable to all stages of paint production and application methods.

Application System

Tech-3722 is suitable for all solvent based systems.

Dosage

Generally 0.1-1% of the total amount, which can be added at any stage of production.

Package

25kg metal pail.

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability in advance.
