

Dispersant Tech-599

Description

Tech-599 is a dispersant with acid group and it is suitable for inorganic pigments in water-based, solvent-based and UV curing systems. It could decrease the viscosity and improve the pigments loading.

Physics and Chemical properties

Ingredient: Copolymer with pigment affinity group

Appearance: light yellow transparent liquid

Content: 100%

Specialty

1. Tech-599 has excellent compatibility with many kinds of resins.
2. Tech-599 could decrease the mill viscosity and it could increase the pigment content in the color paste.

Application System and Dosage

Tech-599 is suitable for both water-based and solvent-based systems.

Usually, it should be charged before the grind stage during the produce, with **1%** to **5%** to other inorganic pigment, with **2%** to **4%** to **TiO₂**.

Package

25kg plastic pail.
