

## Dispersant Tech-654

### Description

Tech-654 is a polymeric dispersant designed suitable for inorganic pigment. It could decrease the viscosity rapidly with low foaming, meanwhile, increase the paint film gross.

### Physics and Chemical properties

**Ingredient** : Copolymer with pigment unique affinity group

**Appearance**: Light yellow transparent liquid

**Content** : 40%

**Solvent** : water

### Specialty

1. Tech-654 dispersant suitable for inorganic pigment dispersion in water borne coating systems.
2. Tech-654 is a polymeric dispersant so that could make the system low foaming.

### Application System and Dosage

Tech-654 is recommended to use in water borne coating systems.

Usually, it should be charged before the grind stage during the produce, with **1%** to **5%** dosage to inorganic pigment

### Package

**25kg** plastic pail.
