

## Dispersant Tech-58024

### Description

Tech-58024 is a dispersant containing pro pigment groups, particularly suitable for systems containing DMF, and has good dispersibility for carbon black and organic pigments

### Physics and Chemical properties

**Ingredient:** copolymer containing pigment-affinity groups

**Appearance:** Light yellow viscous liquid

**Content:** 100%

### Specialty

- ◆ Tech-58024 is particularly suitable for grinding carbon black and organic pigments in DMF system
- ◆ Tech-58024 has excellent viscosity reduction ability and storage stability

### Application System and Dosage

Suitable for medium to high polarity systems, the amount of addition varies depending on the system used. For inorganic pigments, the amount is 10% -15%, for organic pigments, it is 30% -50%, and for carbon black, it is 20% -100%

### Package

25kg

**TECH Polymer**
