

Dispersant Tech-58689

Description

Tech-58689 is a polymeric dispersant with pigment affinity group. It can be used to disperse carbon black, carbon nanotube, graphene and organic pigments.

Physics and Chemical properties

Ingredient: Block copolymer with pigment affinity groups

Appearance: Yellow transparent solution

Content: 30%

Solvent: Diethylformamide

Specialty

1. Tech-58689 is suitable for the medium polarity system has good compatibility with the common coating resin and the popularity in the coating system.
2. Tech-58689 has excellent ability to improve the storage stability tremendously of grinded color paste.

Application System and Dosage

Tech-58689 is suitable for the 2K PU, alkyd, acrylate, polyester, amino baking varnish and UV system

Usually, it should be charged before the grind stage during the produce, with **10%** to **15%** to inorganic pigment, with **30%** to **90%** to organic pigment, with **70%** to **150%** to carbon black or graphene

Package

25kg metal pail.
