

Dispersant Tech-58689

Description

Tech-58689 is a polymeric dispersant with pigment affinity group. It can be used to disperse carbon black, carbon nanotube, graphene and organic pigments.

Physics and Chemical properties

Ingredient: Block copolymer with pigment affinity groups

Appearance: Yellow transparent solution

Content: 30%

Solvent: Diethylformamide

Specialty

- 1. Tech-58689 is suitable for the medium polarity system has good compatibility with the common coating resin and the popularity in the coating system.
- 2. Tech-58689 has excellent ability to improve the storage stability tremendously of grinded color paste.

Application System and Dosage

Tech-58689 is suitable for the 2K PU, alkyd, acrylate, polyester, amino baking varnish and UV system Usually, it should be charged before the grind stage during the produce, with 10% to 15% to inorganic pigment, with 30% to 90% to organic pigment, with 70% to 150% to carbon black or graphene

Package

25kg metal pail.

A company focus on additives since its birth
