

## Substrate wetting agent Tech-2439

### Description

Tech-2439 is polyether modified fluoro compound. It can decrease the system surface tension and provide excellent substrate wetting. Tech-2439 has low foam stability

### Physics and Chemical properties

**Ingredient** : Fluoro-surfactant

**Appearance**: Light yellow liquid ( It will turn hazy at low temperature )

**Content** : 100%

### Specialty

Leveling	Wetting	Recoat Ability	Compatibility	Sliding	Low Foaming Stability	Anti-crater	Anti-adhesive
★★★★★	★★★★★	★★★★★	★★★★★	★	★★★★★	★★★★★	★

### Application System and Dosage

The dosage is around 0.1-1%

### Package

25kg plastic pail.
