

Substrate wetting agent Tech-2841

Description

Tech-2841 is a modified organic silicon compound. It can decrease the system surface tension and provide excellent substrate wetting. Tech-2841 has low foam stability and can supply antifoam ability.

Physics and Chemical properties

Ingredient: Polyether Modified Silicone

Appearance: yellow transparent liquid

Content: 100%

Specialty

Leveling	Wetting	Recoat Ability	Compatibility	Sliding	Low Foaming Stability	Anti-crater	Anti-blck
★★★★★	★★★★★	★★★★★	★★★★	★	★★★★★	★★★★	★

Application System and Dosage

It's suitable for the water-wood-paint, industry water-borne coatings and UV-curable coatings, printing ink systems.

The dosage is around 0.1-1%

Package

25kg plastic pail.
