

Dispersant Tech-6208

Describe

Tech-6208 is a macromolecular hyper-dispersant containing many pigment-affinity groups. It not only has good wettability, but also has excellent abilities of anti-flocculation and floating. It is suitable for dispersing various inorganic and organic pigments in water-based systems. Tech-6208 is also suitable for solvent-based system to disperse inorganic pigments

Physical and chemical parameters

Component: polymer block copolymer containing pigment-affinity groups.

Appearance: light yellow viscous solution

Live fraction: 60%

Solvent: propylene glycol monomethyl ether.

Specificity

- ◆ Tech-6208 is suitable for water-based system and can be used for grinding resin-free water-based color paste.
- ◆ Tech-6208 has good anti-flooding and anti-floating performance.

Application system and dosage

Recommended for aqueous systems.

The addition amount varies according to different use systems. For inorganic pigments, 2%-10%, organic pigments 30%-50% and carbon black 30%-90%.

Packaging

25kg plastic pail

TECH Polymer
